

BLASTCOOL®

ULTIMATE COOLING

The **ULTIMATE** cooler for your outdoor entertaining area.

Blastcool **Extremis**[®]

The new Blastcool Extremis range of Outdoor Food and Beverage coolers is a series of professional grade appliances, specially designed for outdoor use.

Whether it's a summer's day on the Cote D'Azur or a frosty winter's morning in an Alpine chalet, the Extremis series is engineered to be operated outside all the year round. Its advanced components and specially formulated compressor lubricant mean that extremes of temperature are taken in its stride.

Heated glass doors stop condensation in high humidity conditions whilst marine grade stainless steel will retain its clinical good looks for years to come.

Blastcool is the premium brand in the outdoor entertaining sector with installations seen in ocean going super-yachts, villas on the Palm, chic London rooftop gardens and poolside bars throughout Europe's top real estate locations.

Its 30 year design heritage is derived from the exacting standards demanded by professional bar tenders and food service operators in global 5 star locations: Now distilled into the Extremis series, the world's ultimate outdoor refrigerators.

Entertain **in Style**

The world's ultimate outdoor safety rated coolers

XP1

XP2

XP3

Features

Safety approved for outdoor use.
Officially IP Rated and Certified.

Heated glass doors to eliminate
condensation on humid days
